REsource Update Modifications

User & Admin Instruction

Release 1.04.2436

Installed on Terminal Servers RMAP4-TS-03, RMAP4-TS-06.

STIM

The START procedure in the stim sheet: It is no longer mandatory that the CP column be checked prior to the next procedure being entered.

Sign In Window and Exam Room

When the SSN Secure option is turned ON for site, SSN column will display the last 4 digits instead of the complete 9 digit social security number for security purposes:

Last	First	SSN
Cynamon	Toby	-9528

LIS

Added new Wildcard normality tolerance rule:

1. Go to Tools on the Main Toolbar in REsource
2. Scroll and click LIS to open window
3. Click on the Tolerances button at the bottom of LIS window
4. LIS Tolerances window opens:

5. Under RuleTypeID, select Normality.
6. In the ABSValue field, selecting '*' (the wildcard) will interpret any result for a given lab as Normal.

Labcorp Requisition

- Barcodes now print on all pages for the barcodes LabCorp requisition report.
- Added Patient Address which is required for processing a hold order (COR).
- Added report option to enable printing of electronic signature file on LabCorp requisition. This is enabled by default. Therefore, if a physician has a signature on file, it will appear on the requisition.
- Added the verbiage 'PSC Hold' to display on LabCorp requisition sheets for LabCorp hold orders. This is a requirement of Labcorp.
- Added support for the new Thinprint environment to print LabCorp and Quest requisition reports on various printers.

ART Reporter

1. Added Prior BioChemical Pregs entry field to Patient History section of the ART DATA window (blue arrow).

The screenshot displays the ART DATA window for Patient [Do104_Doe, Susan] PatId [104] CycId [11119] Cyc# [4]. The window is divided into several tabs: Intended Treatment, Donor, Sperm and Oocyte, Outcome, [Status], Patient History, and Diag_Treatments. The Patient History tab is active, showing fields for Patient Information and Partner Information. The Patient Information section includes Last: Do104_Doe, First: Susan, MI: [], DOB: 11/12/1966, Ethnicity: Unknown, US Resident: Yes, City: Basking Ridge, Country: USA, State: NJ, and Zip: 07920. The Partner Information section includes Name: [], Ethnicity: [], Sperm Donor Identity Unknown: [], and Data Verified: []. The Patient History section includes Gravidity: 4, Prior Full Term (>= 37 wks) Births: 0, Prior Pre Term (< 37 wks) Births: 1, Prior Spontaneous Abortions: 0, Prior BioChem Pregs: 0, Surgical Sterilization: No, and Data Verified: []. A blue arrow points to the Prior BioChem Pregs field.

2. Added CP Date (Cryopreservation Date) to Transfer section on the Sperm and Oocyte Tab in the ARTDATA field (green arrow). When previously cryopreserved embryos are thawed and transferred in an IVF cycle, this field will populate with the date of the oldest (earliest) cryopreserved embryo.

Patient [Do104_Doe, Susan] PatId [104] CycId [11119] Cyc# [4]

[Status] Patient History Diag.

Intended Treatment Donor Sperm and Oocyte Outcc

Retrieval
 Patient Retrieval Date: [] Donor Retrieval Date: []
 Oocytes Retrieved: [] Donor Oocytes Retrieved: []
 Embryos Thawed: [0] Donor Shared: [] Data Verified []

Andrology
 Sperm Source: [] Collection Method: [] Data Verified []

Micromanipulation
 ICSI: [None] PGD: [No Embryos] Assisted Hatching: [None]
 PGD Indication: [] # Emb Diag'd: [Unknown]
 # Emb Biopsied: [0] Confirm At: []
 Genetic Analysis Perf: [] Misdiagnosis [] Data Verified []

Transfer
 Transfer Attempted Transfer Date: [] CP Date: []
 # of Fresh Embryos to Uterus: [0] # of Thawed Embryos to Uterus: [0]
 # of Fresh Embryos to Tubes: [] # of Thawed Embryos to Tubes: []
 # of Oocytes to Tubes: [] # of Thawed Embryos Refrozen: [0]
 # of Fresh Embryos Cryopreserved: [0] Data Verified []

- Added 'Clinic' droplist to SART Cycle Maintenance page. (Red circle)

SART Cycle Maintenance

Clinic: [7005] Reporting Year: [2000] Default Year []

Criteria for Art Year 2000
 Start: [3/16/2000] End: [3/16/2000] NRS: [] Status: [] Load []

This allows for managing multiple SART clinics in a single site. The droplist only appears when your facility is serving more than 1 clinic location.

Patient Intake

- Added Prior BioChemical entry question on 'Pregnancy/Surgery' folder and 'SART Only' folder. In the intake editor window, you can scroll to 'Pregnancy/Surgery' and 'SART Only' folders. This is a necessary field for reporting to SART.

- In the intake editor window, you can scroll to 'Infertility' folder and click to open. The columns in Clomiphene and Gonadotropins tables were modified:

Old Column Name	New Column Name
Dates	Date

#Cycles	Cycle Number
#Insemination	Insemination
#Pregs	Pregnancy

- If there is legacy data (data that was entered into the tables prior to this release), the tables will appear in the old format prior to this release.
- A label indicating that the data is considered legacy will also appear on the right-hand side of the table.
- A button to the right of the tables will allow switching to the new data entry tables.

Quest Requisition

Modified report to include lab header on subsequent pages (after page 1) to prevent crushed font displaying on some printers.

Demographics Bridge

Added support option for setting the 'Other Phone' field to the selection 'Business phone' or 'Cell'

BUG FIXES

Corrected lab requisition printing performance issue.

Corrected the system error that occurred when changing the location for a particular stim that was currently set to a retired location:

- Select stim row by highlighting it
- Right Click
- Select Stim Location

Day	Date	Event	Lab
-45	03/06/2000	With	SU B
-38	03/13/2000
