# REsource Update Modifications

## User & Admin Instruction

Release 1.04.2390

### Patient Demo

Country is now an editable droplist. Values entered that are not in the list will appear in RED. On Resource Main Toolbar, click Patient, scroll to Demographics:

Demographics

Addr Line 1:

Addr Line 2:

City:

State:   Zip:

Country:

Email:

Country is now an editable droplist.

**NOTE:** Admin Setup: When reviewing the lkupCountries Table in the LookUp Table Manager: Fields/values entered that are not in the list, will appear in RED.

- The state droplist will repopulate with states when countries that have states (USA, Mexico or Canada) is selected for country.
- Blank country defaults to USA states (like it always has).
- System switches were added to turn on hard validation for Country and State. When these switches are on, the demo form/patient details form will not save unless a valid State and country are entered or they are blank.
- Med Software have left these switches turned OFF and will turn them on at your request.

### SA Form

New field added to track review date.

On the Main resource Toolbar, click **'Male'** and scroll to **'Semen Analysis'**.

Click this when reviewed and 'Sent' field will populate with today's date. (red arrow)

[ Id: 96029 ]    aaa, aaa

\*\* Notice the date at the top and the Reviewed box is checked. (circled in red for easy viewing)

### IVF Scheduler

Currently only 2 stim types (Cryo natural and synth) are seen in the system as Cryo start by the IVF Scheduler. A new attribute was added that can be configured to allow other stim types to be seen this way so they can be scheduled as Cryo starts in the scheduler. This might be useful if a new cryo stim type was added to the system.
